 Contact closure resistance: Open > 300 k ohms Closed < 15 k ohms

Light On/Off Logger

Internal light sensor monitors on/off of fluorescent or incandescent lamps. The light sensitivity is peaked in the forward range and can be utilized to minimize the effect of other light sources when trying to determine the on/off state of a particular light source.

Light intensity threshold: 10 to 100 lumens/m² [0.93 to 9.3 footcandles (lumens/ft²) (fluorescent light)], adjustable. For incandescent lamps the threshold is about ten times greater than above.

Motor On/Off Logger

Internal sensor monitors the AC field generated by motors, transformers, or a single wire carrying a large AC current. The logger can be conveniently mounted directly on a motor housing without requiring access to the motor internals.

Note that the logger must be mounted very close to the field source, as magnetic intensities fall off rapidly with increasing distance from their source.

AC magnetic field threshold: 750 m Gauss @ 60 Hz (depending on distance and orientation)

1-Event/3-State Logger

Simultaneously monitors and logs state changes in up to three locations, as well as one time/date-stamped event

- Can be used with CSV-A8 Current Switch

 External contact input: Passive relay switch or contact closure
 Event resolution: 1 second
 Minimum pulse length: 2.5 milliseconds
 Maximum total cable: 32 m (105 ft) (if using state and event channels)

Contact closure resistance: Open > 300 k ohms
 Closed < 10 k ohms

NIST Certification: Test and certify the accuracy of new and previously purchased Onset temperature loggers using standards traceable to the U.S. National Institute of Standards & Technology (NIST). Each logger certified receives a certificate showing the logger's temperature accuracy versus a NIST-traceable standard. Depending on the product, available from -30 to 120°C

Onset's NIST traceable certification complies with ISO 10012-1:1992 (E) requirements (excluding pressure calibration certificates). Onset also offers a Certificate of Compliance which certifies logger compliance with the specifications described in its product manual.
